By leveraging our in-house knowledge of DC power, inverters, batteries, generators, thermal management, UPS, alternative and other energy sources, we pay attention to the entire system and ...

Origotek's energy storage cabinet is designed for diverse industrial and commercial needs, covering key scenarios such as peak shaving, virtual power plant participation, backup power supply, and three ...

The core function of this cabinet is to safely, reliably, and efficiently interface the DC power generated by the PV system (after inversion by the inverter) with the 400V low-voltage grid, ...

Our integrated plant communication ensures a secure system connection to the internet. At the same time, it provides the complete plant communication of all stakeholders and grants the necessary ...

It controls local energy management and grid interaction functions. The VPP may incorporate local dispatchable power generation (combined heat and power units and microreactors), local renewable ...

Advances in power conversion technologies and increasing use of DC-based equipment at core sites has driven 12V and 400V DC power distribution to become a safe and viable alternative to traditional ...

Standards-based power line carrier solutions provide an attractive communication channel for all applications in medium-voltage and low-voltage Smart Grid scenarios.

The Vertiv™ NetSure™ HVT solution includes all of the components required for your 400V HVDC power site including a rectifier cabinet, DC distribution cabinet, optional AC distribution cabinet, PDU ...
