About This report tracks solar and wind generation in ASEAN between 2015 and 2022, and analyses the additional capacity needed by 2030 to align with the International Energy Agency ...

With grids in ASEAN countries dispersed around many islands and less interconnected than other parts of the world, energy storage presents an excellent opportunity to keep networks ...

This chapter presents perspectives on greening ASEAN by potential solar PV and wind deployment coupled with battery storage to provide a stable and resilient energy system ...

Huawei and Keppel have signed a Memorandum of Understanding (MoU) to develop solar and battery energy storage system (BESS) projects for the data center and other high-energy ...

The Southern Johor Renewable Energy Corridor (SJREC) will be developed as part of a \$6 billion project for a 2,000 kilometer-squared hybrid solar and battery energy storage system zone ...

Southeast Asia can look to Australia and Japan as examples of how to promote the adoption of energy storage systems (and, once the necessary regulations are in place, the potential speed of the rollout).

The ASEAN Centre for Energy (ACE) projects the region's total final energy consumption to increase by 146% by 2040, highlighting the urgent need for robust energy storage systems.

Contemporary Amperex Technology Co., Ltd. (CATL), a global leader in innovative new energy technologies, has officially signed an agreement to supply a 2.2 GWh battery energy storage system ...
