-----

AIKO, headquartered in China, has launched Phase-1 of its Jinan factory, a CO2-free intelligent facility, producing its first N-Type ABC solar panel as part of its 10 GW operations. The ...

Aiko Solar has started production at its Jinan factory, its third facility for n-type all-back-contact solar modules. The plant is designed for 30 GW of solar cell and panel capacity, with the first 10 GW ...

With industry-leading warranties and a reputation for durability, AIKO panels are built to withstand Australia's harsh climate conditions, from scorching summers to stormy winters.

AIKO focuses on the R& D and manufacturing of core photovoltaic products and provides integrated "solar-storage-application" solutions. Its main offerings include high-efficiency solar cells, ...

The first solar panels have been produced in Aiko's new factory, which features a 1.5-kilometre-long cell and module production line.

Aiko states that the module workshop in Jinan is operational and the cell aspect will be fully functional by the end of 2025. The entire 30 GW plant will be completed and dusted by 2029 if ...

AIKO is a world-leading new energy technology company that focuses on R& D and manufacturing of PV core products and integrated solutions for power generation, storage, usage, ...

The new factory, with a designed production capacity of 30GW of ABC solar products per year, will be completed between 2024 and 2029, and is AIKO's third manufacturing base for solar cell and module ...
