How do arc flash relays work?

All Arc flash relays can connect with remote light sensors to detect arc flashes quickly and send a trip signal to interrupt power. They can be used for stand-alone devices or embedded in complex switchgear layouts. Our arc flash relays are trusted for workplace safety by B2B buyers worldwide.

What is arc quenching Magnum DS switchgear?

The arc quenching Magnum DS switchgear detects and extinguishes an arc flash in less than 4 ms to dramatically reduce incident energy. It reacts 10x faster than systems that rely solely on circuit breakers to clear an arc fault, including maintenance switches, ZSI, bus differential relaying and arc detection relays.

Can a relay and breaker be used to clear an arc flash?

Relay and breaker settings can often be optimized to trip quickly to clear an arc flash event but also maintain coordination. When coordination cannot be maintained to achieve desired arc flash results, a maintenance switch can be added.
