Officials with Unitil, an electric and natural gas provider based in Hampton, New Hampshire, have broken ground on a first-of-its-kind project in the state.

Unitil has begun site work on the state's first regulated utility-owned solar array located on 36 acres of vacant land in Kingston.

Deliver large-scale renewable energy solutions in Kingston with our utility-scale solar power installations. Drive down energy costs and meet demand with sustainable, grid-connected power.

The City of Kingston is currently working on several solar projects. Kingston is a designated Clean Energy Community and a Silver Certified Climate Smart Community.

Instead of installing a renewable energy project on your property, you subscribe to a solar farm in our area. It costs you nothing to join, you save money on electricity, and you support new solar energy ...

The MistLight Solar project, located in the City of Kingston, is a proposal competing under the Independent Electricity System Operator's (IESO) newly created Large Renewable Procurement ...

One of New Hampshire's largest public utility-owned solar projects is now complete. Unitil held a ribbon-cutting ceremony for its new solar array in Kingston on Wednesday.

We have over 500 spots available, but because space is limited, I encourage Kingston residents to take advantage of this innovative program before subscriptions are filled."
