How many MW of battery energy storage in Argentina?

Argentina's government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW target by about 30%.

What did Luchilo say about Argentina's energy storage tender?

Luchilo spoke in a fireside chat with Energy-storage.news during the fourth edition of Energy Storage Latin America in Santiago, Chile, earlier this month about Argentina's recent AlmaGBA tender, which saw nearly 700MW of battery energy storage systems (BESS) awarded for an initial tendered capacity of 500MW.

How much electricity does Argentina need?

Luchilo explains that Argentina's electricity demand can vary greatly throughout the year, both during the summer and in winter time. During the summer, the country can reach highs of 31GW of energy demand during the hotter days whereas more normal summer days can reach up to 21GW.

CAMMESA spoke at Energy Storage Latin America 2025 about Argentina's latest standalone tender and what to expect in the future.

Argentina is rapidly adopting Battery Energy Storage Systems (BESS) to stabilize its renewable energy grid and meet growing power demands. This article explores the applications, trends, and ...

The company recently secured 205 MW of Battery Energy Storage System (BESS) projects. These systems are crucial for grid stability, as they store excess solar energy generated ...
