As the pioneers in the industry, and true innovators, we are proud to offer solar power directly to your swimming pool or Koi pond with the new BADU®Solar Smart.

The Auxiliary Load is a relay inside the control designed to provide AC power to a load that should not be energized without adequate water flow from the pump (i.e. heater, boost pump, salt water ...

Access brochures, manuals, and technical data for BADU pool products. Find comprehensive resources to support your pool technology needs.

The BADU®Solar Smart is designed to generate solar power to improve the sustainability of your water system.

The BADU Top PS600 is a solar-powered centrifugal surface pump designed for pumping thin, clean, non-aggressive, non-explosive liquids. This instruction manual provides information on installation, ...

Manual PS600 BADU Top 12 System Wiring Diagram for Solar-direct (non-battery) System This is an example, using 4 X 12V-nominal PV modules. Your system may vary in the number, voltage, and ...

The BADU® solar system makes use of 315W solar panels with a current supply of 338 volts and a booster to generate DC power from the sun. Through the controller box, AC power is converted ...

It can run on solar alone or in conjunction with power from the grid to ensure consistent water quality. To achieve optimal power generation, the solar panels are installed in rows and aligned towards true ...
