How can Barbados improve its energy security & resilience?

The Ministry's objective is to improve Barbados' energy security and resilience, as well as reduce its dependence on imported fossil fuels, resulting in the retention of foreign exchange and the improvement of the country's economic competitiveness. Key activities include: Implementing Public Education and Public Awareness activities.

Why should Barbados invest in the energy sector?

The energy sector in Barbados should be invested in to foster development, promote energy security, reliability, affordability, and establish and maintain a sustainable sector. This can be achieved through innovation and workable partnerships which promote a strong economy and a healthy environment.

Will Barbados become a 100% Green Island-state by 2030?

The focus of the Ministry is to advance legislation, policy and programmes to give life to Government's stated policy of transitioning Barbados to the world's first 100% green energy and carbon neutral island-state, by 2030.

Caban, a Miami-based renewable energy company, is working closely with Digicel to install solar-powered battery packs equipped with advanced software at 60% of Digicel's cell sites throughout ...

They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.

These base stations leverage 5G technology to deliver swift and stable communication services while simultaneously harnessing solar photovoltaic power generation systems to fulfil their ...

AIMS-SB helps to foster a holistic approach to control and provide adaptive operational optimization, building energy management systems for an integrated building automation and energy ...

Our Mission To promote and facilitate energy security reliability and affordability, and establish and maintain a sustainable energy sector for Barbados.
