Voltaplex is proud to design and manufacture high-voltage battery packs for energy-intensive applications. We build each pack to meet the performance and safety requirements of commercial, ...

Our HV-PACK120S-100 is a 10kWh battery pack that features a wide array of safety and connectivity options using our HV-BMS-100 system. With a high gravimetric energy density, the pack can be ...

Accelera NMC high-voltage packs maximize energy efficiency and durability, charge from zero to 80% in less than one hour and have integrated battery system management (BMS) for instant system health ...

Our modular and versatile HV Box houses three modular components: the Battery Junction Box (BJB), Battery Management Controller (BMC) and the HV Sensor. Together, these components deliver a ...

You've got a cutting-edge high-voltage battery box capable of powering a small neighborhood. But without proper management, it's like having a Ferrari with square wheels.

The traditional BJB is a relay box or a switch box with power contactors that connects the entire battery pack to the load inverter, motor or the battery charger.

A: 2.97kWh is the initial capacity (designed) of the Energy Storage Module. B: The actual capacity is affected by the external environment (such as temperature, transportation, and storage).

Customizability: Rack-mounted high-voltage lithium batteries can be customized to meet specific needs. You can select battery capacity, voltage, and other parameters to meet the needs of your specific ...
