Why should we build a large-scale energy storage station?

Building hundreds of MW-scale HESS is an inevitable development tendency. Renewable energy generation station with large-scale ESS is expected to replace traditional power stations completely in the future and contributes to sustainable development. 5.2.2. High energy storage efficiency

Is ESS suitable for large-scale storage?

While some characteristics approached the standards for large-scale storage, such as 112-Wh/kg energy density, a 20-year lifetime, and 7300-cycle times, it exhibited an inevitable parasitic loss factor of 1 %, resulting in substantial energy loss. Additionally, numerous other ESSs suitable for various scales exist.
