NYSERDA is providing incentives that can help accelerate deployment of bulk energy storage projects that provide wholesale market energy, ancillary services, and/or capacity services.

Let FEMP's steps to evaluating electricity procurement guide the way. Find utility programs that meet statutory requirements or offer financial incentives. FEMP's six-phase process for implementing ...

Please describe the unique services and benefits that distribution-connected energy storage systems can provide over transmission-connected energy storage systems.

In the day-ahead stage, the microgrid operator must determine the optimal capacity procurement of VES (e.g., through demand response) for smart operation. For this purpose, this ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase ...

For transmission connected Projects to be considered viable for this procurement, they must have accepted cost allocation as part of the NYISO Interconnection Process before bidding.

NYSEG has developed a request for proposal (RFP) to procure a minimum of 10 MW of energy storage projects to be in service by December 31, 2030. This initiative will help meet energy storage goals ...

I'm interested in learning more about your Tender and Procurement of Grid-Connected Photovoltaic Folding Container for Unmanned Aerial Vehicle Stations. Please send me more information and ...
