Wine needs to be stored at room temperature, right? WRONG! Room temperature refers to the temperature of a subterranean wine cellar not our cozy centrally heated homes. The ideal ...

Many urban wine shops and private storage companies offer climate-controlled wine lockers or cellar rentals. These allow you to age bottles professionally offsite--with some offering app ...

We don't keep keys to the wine lockers and so you must pick up your wines from our receiving area located within the cellar at a later date. However, if you have a 200 case walk-in cellar or larger, and ...

Wines stored in apartments for an extended period should be stored in a portable wine refrigerator. A countertop wine cooler is not very expensive and holds about 18 bottles of wine.

Red wines should be stored between 54°F and 64°F (12°C-18°C), while white wines require a cooler range of 45°F to 55°F (7°C-13°C). Storing wine below 45°F creates a risk of cork ...

Keeping the correct humidity level in your wine cooler or storage area is a must-do. A humidity above 70% can damage the labels but is ok for the wine, just don't let the humidity exceed 80% for the wine. A humidity level below 50 percent can damage the wine corks. The humidity level is to keep the corks moist and the labels dry, you also want to a...
