Here, we are listing out some of the best solar energy projects especially collected for engineering students. So, if you are interested, you may check this list of projects ideas based on ...

Electerro, a solar and wind generator built to resemble a birch tree, won top honors at the Invent Oregon Collegiate Challenge on Friday, taking home a \$10,000 prize for a prototype that ...

A Nigerian student studying at the Federal University of ...

In 1954, scientists at Bell Labs introduced the first practical silicon solar cell, which significantly improved energy conversion efficiency. This innovation laid the groundwork for ...

Electerro, a solar and wind generator built to resemble a ...

A final-year student from the University of Agriculture, Makurdi, Benue State, has earned widespread admiration for creating a solar-powered generator that eliminates the need for fuel.

Among these are two students of Comboni College in Northern Uganda, who have developed a smoke-free, fuel-less electric generator that is lighting up tens of bulbs.

Through the program, students will build an advanced solar-powered generator that will ultimately serve as a backup energy source for their campus, while supporting predominantly African ...
