We investigate the use of wind turbine-mounted base stations (WTBSs) as a cost-effective solution for regions with high wind energy potential, since it could replace or even outperform ...

technical field [0001] The invention relates to the technical field of new energy communication, in particular to a communication base station based on wind and solar complementarity.

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility features: flexible search ...

The invention relates to the technical field of communication, in particular to a communication base station.

The wind-solar-diesel hybrid power supply system of the communication base station is composed of a wind turbine, a solar cell module, an integrated controller for hybrid energy ...

Embodiments of this application provide a heat exchanger, a cabinet, and a communications base station, which resolve a technical problem in the conventional technologies ...

Discover the Pole-Type Base Station Cabinet with integrated solar, wind energy, and lithium batteries. Designed for seamless installation and remote monitoring, this energy-efficient cabinet ensures ...

The invention provides an outdoor integrated communication base station cabinet, which effectively solves the problem of space limitation in the maintenance process of a line in the...
