e-DECKBOX is our fully integrated, CE-certified, ready-to-use mobile solar system, specially designed for 20- or 40-foot shipping container roofs, modular buildings, mobile cabins, pergolas, etc.

The system starts with photovoltaic (PV) panels mounted on the roof or adjacent racks of the container. These panels capture sunlight and convert it into direct current (DC) electricity.

Solar support structure for adding solar panels to top of 40ft shipping container. Kit includes, rafter legs, support rails and Pro Solar module clamps.

We partner with Stealth Power to acquire and install the solar arrays on top of the container during the build. Stealth Power's stick-on panels make installation quick and easy. The roofs of our containers ...

Introducing our Container Solar Mounting Photovoltaic Support System--a game-changing solution that transforms unused container roofs into efficient solar energy generators.

A solar panel on a shipping container project integrates photovoltaic (PV) technology into standard shipping containers. These units function as self-powered mobile offices or workspaces.

Thinking of adding solar panels to your shipping container? Learn key considerations, how many panels fit on 20ft and 40ft containers, plus tips and real-world examples.

Explore our range of high-efficiency solar container solutions designed for businesses worldwide. Our containers combine cutting-edge technology with durability and ease of deployment.
