**PRICE INCREASE:** Electricity bills are set to increase significantly in Aitutaki and Rarotonga next month as high fuel prices force power entities to pass...

The Cook Islands is a net importer of energy, in the form of petroleum products. Total energy consumption was 1,677,278,000 BTU (1.77 TJ) in 2017, of which 811,000,000 (0.86 TJ) was in the form of oil. In 2012 47% of imported oil was used in the transport sector, 30% in aviation, and 27% for electricity generation. Electricity consumption is 31.6 GWh, from 14 MW of installed generation capacity, with most load concentrated on the main island of Rarotonga. Per-capita electricity consumption is approximately two ...

**Feature highlights:** This 220V Portable Mobile Digital Power Supply is designed for outdoor emergency energy storage, featuring a lithium battery with a capacity range of 252WH-756WH and power ...

Explore data sources and methodology for electricity generation statistics in Cook Islands. Compare yearly, monthly, and rolling 12-month data sources.

The Tribunal meets regularly to determine the maximum prices of products including petrol, diesel, LPG and bread. MFEM acts as the Secretariat for the Price Tribunal.

It is a fact that as long as we generate our power with fossil fuels as the dominant source, our power prices will not come down. It is a fact that Renewable Energy, especially solar generated power is far ...
