---

Cyprus has commissioned its first major battery energy storage system (BESS). Discover the 50 MW project's partners, technical details, and impact on grid stability and renewables.

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by the University of ...

Discover how a commercial battery energy storage system in Cyprus can reduce peak demand charges and boost your business's energy efficiency.

In a move set to transform the country's energy landscape, the Cyprus Energy Regulatory Authority (CERA) has greenlit the development of three state-owned battery storage projects.

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Pressured by curtailments of renewable electricity and frequent outages amid a lack of flexibility, Cyprus is in a rush to install battery energy storage systems (BESS).

By pairing residential PV with battery storage, households can increase self-consumption, reduce reliance on the grid, and improve energy resilience during outages.

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is ...
