Where can I find information about a mobile base station?

All mobile base stations have a site specific information page on the internet database called the Radio Frequency National Site Archive () that provides details about the location, environmental EME levels, compliance and carrier contact details.

Are mobile base station sites EME compliant?

The Radio Communications Licence Conditions (Apparatus Licence) Determination 2015 mandates that the operation of equipment does not exceed the general public exposure limit. All mobile base station sites are required to be approved for EME compliance. This process ensures the safety of the General Public.

What is a cellular base station?

A cell site, cell phone tower, cell base tower, or cellular base station is a cellular -enabled mobile device site where antennas and electronic communications equipment are placed (typically on a radio mast, tower, or other raised structure) to create a cell, or adjacent cells, in a cellular network.

What is a precautionary approach to mobile phone base stations?

It ensures greater community consultation and participation in the siting of mobile phone base stations and requires carriers to apply a precautionary approach, during the site selection, design and operation of mobile phone base stations.

Summary Overview Operation Temporary sites Employment Spy agency setup Off-grid systems Camouflage A cellular network is a network of handheld mobile phones (cell phones) in which each phone communicates with the telephone network by radio waves through a local antenna at a cellular base station (cell site). The coverage area in which service is provided is divided into a mosaic of small geographical areas called "cells", each served by a separate low power multichannel transceiver and antenna at a base station. All the cell phones within a cell communicate with the system through that c...

The Communications Alliance Mobile Phone Base Station Deployment Code 2018 (or "the Code") outlines the steps telecommunications carriers must take when deciding the location and design of ...

Detailed site plan. Except where the facility will be located entirely within an existing structure or an existing building, a detailed site plan should show: Existing and proposed improvements. The ...

Technical overview of base stations, cells, sectors, and carriers: explains antenna sites, sector vs. cell distinctions, and how carrier and carrier frequency define logical cells.

The guidelines apply to mobile phones as well as base station sites and incorporate wide safety margins to protect against all established health effects of RF exposure.

Our objective is to demonstrate that mobile operators could use their existing infrastructure to participate in the reserve market of a contemporary power grid. Furthermore, it seeks to determine ...

Another variation on the Distributed BTS concept is the capacity transfer system, in which a single BTS with a digital connection to the BSC (Base Station Controller) is connected to additional tower sites ...

All mobile base station sites are required to be approved for EME compliance. This process ensures the safety of the General Public. Compliance relies on the successful design of a mobile base station ...
