How many electric cars are there in Denmark?

To this end, Copenhagen, Aarhus, Odense, Aalborg, Vejle and Frederiksberg signed what is called the Climate Cooperation Agreement with the Danish Ministry of Transport in June. Currently, of the 2.5 million vehicles registered on Danish roads, only 20,000 are electric.

How will Denmark's new electricity tax affect EV drivers?

From January 1, 2026, Denmark's electricity tax will drop from 72.7 ¢/kWh to just 0.8 ¢/kWh. For EV drivers, this means significantly lower running costs, no more complicated refund schemes - and a much simpler electricity bill. The new tax level translates directly into savings for drivers.

When will Electric and plug-in hybrid cars be taxed in Denmark?

In 2022, the Danish parliament modified the taxation of electric and plug-in hybrid company cars. The new rules will be active from 2023 up until 2026. Denmark is currently working towards a 70% economy-wide reduction of GHG emissions by 2030, compared to 1990-levels.

What are Denmark's new emissions rules?

The new rules will be active from 2023 up until 2026. Denmark is currently working towards a 70% economy-wide reduction of GHG emissions by 2030, compared to 1990-levels. The transport sector is one of the largest sectors in terms of greenhouse gasses, with private road cars being responsible for the majority of the emissions.
