Estonia's electricity sector is interconnected with regional energy markets, particularly through connections with Finland and Latvia. The direct electrical interconnection with Finland was ...

This project will serve as a VRFB reference site for the mining industry, utilities and other power users, and showcase the technological and commercial benefits of long-duration VRFB systems coupled ...

Vanadium is a strategic transition metal that has been extensively utilized in steelmaking, green chemistry, energy storage, and aviation industries, and the sustainable development of...

To address its energy needs, Estonia now relies on pipeline connections to LNG terminals in Klaipeda, Lithuania, and the new Inkoo LNG terminal in Finland. Eesti Gaas, the main gas supplier, has ...

OverviewEnergy securityEnergy plan and targetsEnergy typesElectricityTransport sectorAmidst geopolitical tensions, Estonia took decisive action to reduce its reliance on Russian energy sources, particularly in response to Russia's invasion of Ukraine. Previously heavily dependent on Russian imports for natural gas and oil products, Estonia ceased importing Russian pipeline gas in April 2022 and implemented a ban on all imports and purchases of Russian natural gas, including liquefied natural gas (LNG), in September 2022. In December 2022, Estonia further reinforced its stance by pro...

Here, we present living databases gathered from vanadium stakeholders across the world that capture a holistic, up-to-date snapshot of the vanadium economy along vectors of ...

Data and information about power plants in Estonia plotted on an interactive map.

Though vanadium has historically been closely tied via supply and demand with the construction steel industry, the explosive growth in vanadium deployment for energy storage in the ...
