You know what M.D. means, but what does D.O. mean? What's different and what's alike between these two kinds of health care providers?

Once installed, solar panels produce electricity with virtually no air pollution or greenhouse gas emissions. However, maintenance is still required, and the production and disposal ...

The body needs cholesterol. But having too much cholesterol in the blood raises the risk of heart attacks and strokes. Statins block an enzyme the liver needs to make cholesterol. This ...

Once installed, solar panels don't release harmful substances, generate clean electricity for 25+ years, and are backed by ongoing improvements in manufacturing and recycling practices. ...

Learn about symptoms of urinary tract infections. Find out what causes UTIs, how infections are treated and ways to prevent repeat UTIs.

Solar panel manufacturing involves multiple steps, including wafer production, cell fabrication, and module assembly. Each step requires energy and emits greenhouse gases. Energy ...

Making solar panels creates pollution and uses harmful chemicals. For instance, the International Renewable Energy Agency (IRENA) estimates that by 2050, discarded solar panels ...

Diagnosis Diagnosis involves the steps that your healthcare team takes to find out if hydronephrosis is the cause of your symptoms. Your healthcare professional starts by asking you ...
