Why is GE Vernova launching a H-class gas turbine in Dominican Republic?

This project marks GE Vernova's first H-Class gas turbine order in the Caribbean. It will contribute to the implementation of Dominican Republic's climate ambitions and sustainable development goals by supporting the rapid expansion of renewable energy through its dispatchable power profile.

What is the Dominican Republic's energy transition strategy?

nce the Last IterationThe Dominican Republic is committed to promoting ambitious energy transition strategies that allow for earlier and deeper reductions in greenhouse gases. All actions implemented seek to make innovation, competitiveness and development compatible with the environmental commitments agreed at the national a

Does the Dominican Republic have a sustainable development?

sustainable development. The Dominican Republic has been, and will continue to be, a regional leader in attracting foreign investme

Where is enerla power station located in the Dominican Republic?

Enerla operates the natural gas terminal in the south side of the Dominican Republic. A second phase of the Manzanillo power station, with another 420 MW of combined cycle power production, was entrusted to Manzanillo Energy, a consortium of Coastal Dominicana, Manzanillo Energy and Lindsayca. The start of construction date has not been announced.

The supply of oil-derived fuels, the entry of natural gas, the implementation of a power generation plant from the LNG, as well as other industrial projects have a perfect place in Manzanillo.

GE Vernova's H-Class equipment to power San Felipe plant in Dominican Republic, supporting efficient electricity generation and renewable growth, reducing emissions intensity in the ...

Developed by the Dominican capital's private consortium Energ&#237;a 2000 SA, the facility will be part of the energy complex in Montecristi province. The breakwater, which enhances the port's ...

This project marks GE Vernova's first H-Class gas turbine order in the Caribbean. It will contribute to the implementation of Dominican Republic's climate ambitions and sustainable development goals by ...

e battery systems in the Dominican Republic. Located on sites in the Santo Domingo region, each of the two systems supplied b clude at least 50% battery storage capacity.

The new power plant is part of the Manzanillo Port development that features a natural gas terminal, port with reception pier and breakwater and more than 800 MW in electric power ...

Smith Cogeneration Dominican Republic Power Project was one of the world's first and the largest floating platform combined-cycle power plant. This innovative use of GE technology has allowed the ...

Despite the present administration's efforts to increase the installed capacity of electricity generation from renewable sources, the electric power sector continues to be one of the most significant ...
