Shepherds and animal breeders in the western city of Izmir, Turkey, can now charge their electronic devices, listen to the radio and even log on to their laptops while working on remote mountainsides, ...

Imagine installing solar panels on a mountainside as steep as your last rock climbing adventure. That's exactly what photovoltaic mountain support systems with anchor cables are achieving - and no, ...

Our peculiar image of the week features the innovation of the Turkish shepherds. To stay connected they fasten solar panels and battery packs to the donkeys that accompany them to the desolate ...

For many years, the remote village of Zardaly in Kyrgyzstan was completely cut off from the grid, nestled deep within the mountainous Ferghana Valley. However, recent developments have ...

As global energy demands grow 18% faster than grid upgrades (2024 Global Solar Trends Report), engineers are literally reaching new heights with photovoltaic panel mountain installations. But what ...

Many solar energy companies have started leasing land from farmers to build solar farms - and hiring sheep to control ground cover. The trend has been a revitalizing force in the North Carolina sheep ...

The video shows a donkey equipped with a large panel strapped to its back walking across rocky, dry terrain. Ser-Gün, a Turkish solar panel producer, is behind the project.

But here's the kicker: donkey caravans are currently moving photovoltaic panels to some of the world's most critical solar installations. In Morocco's Atlas Mountains and Kenya's Rift Valley, these four ...
