Enter sodium ion batteries - think of them as the friendly cousin of lithium-ion, but using one of Earth's most abundant materials. The EK sodium ion energy storage system represents a breakthrough ...

With the global demand for sustainable energy solutions, investing in Sodium-ion Battery manufacturing has immense potential. Setting up a Sodium-ion Battery manufacturing facility ...

The big beginner's guide explains the sodium-ion battery in simple terms and discusses the potential of this young technology. No prior knowledge is required and the functionality, ...

In this guide, we'll explore actionable methods to streamline EK battery pack factory production time while maintaining quality. Whether you're a project manager or a procurement specialist, these ...

The Santa Clara, California-headquartered sodium-ion battery technology company will build the sodium-ion battery gigafactory in Edgecombe County, North Carolina, where it expects to produce ...

In this step-by-step guide, we will explore what sodium-ion batteries are, their unique advantages over lithium-ion batteries, and how they work. We will also dive into the various cathode...

TL;DR - I'm building the worlds' first electric skateboard powered by sodium ion batteries. They use a type of salt (not table salt lol), instead of Lithium. It's a relatively new battery chemistry ...

The battery builders thread has gotten too long to read through for new battery builders, so this thread will guide you through building a brick-style battery pack out of li-ion cells.
