The system is IP54 rated for dust and water resistance and operates efficiently in temperatures ranging from -20°C to +50°C. It is built with industrial-grade materials to withstand harsh outdoor environments.

Optimizes energy usage by charging during off-peak hours and discharging during peak demand, helping balance the grid load. By leveraging time-of-use pricing, it effectively reduces electricity costs.

As electric vehicles (EVs) surge in popularity, the demand for reliable, weather-resistant charging infrastructure grows. But how do you ensure your EV charging stations can withstand rain, ...

Compatible with various EV models and charging standards, offering wide application versatility. Intelligent management ensures efficient charging and enhances system longevity.

You can add high-value fast-charging bays now, keep queues short at rush hour, and avoid (or defer) transformer upgrades. With 200-1000 V DC output and dual ports (GB standard), the ...

All-in-one modular design Support up to 10 cabinets in parallel Support 2/4/6/8-hour energy storage applications Higher energy density to reduce footprint PV and BESS DC Coupling

> Built-in AC 180-264V 1500W fast charging > Solar panel XT60 port 12-60V 800W charging > Daisy Chain capacity extension, hot-swappable > LCD display remaining time and power load > Health ...

Empower your off-grid projects and grid-support applications with a reliable outdoor battery storage cabinet from TOPBAND. Engineered for harsh climates and demanding workloads, our outdoor ...
