Did electric car sales boost the overall car market?

In spite of this, electric car sales did boost the overall car market, as sales of conventional cars stagnated. A total of 24 new electric car models were launched in 2024, increasing model availability by 15% compared to 2023, providing consumers with more choices and further increasing competition.

What will EV sales look like in 2025?

This would mean electric cars account for 6% of all car sales outside of the three major EV markets in 2025, up from 5% in 2024. The strong growth seen in Southeast Asia and Brazil is expected to continue, reaching sales of more than 0.5 million combined in 2025.

Are EV sales slowing down?

Global sales of electric vehicles continue to rise and are set to represent one in four cars sold this year. But some markets are experiencing a significant slowdown, and many automakers have pushed back their EV targets.

How many electric cars were sold in the first quarter of 2025?

More than 4 million electric cars were sold in the first quarter of 2025 as sales grew by 35% compared to the first quarter of 2024, which was higher than the growth rate observed in the first quarters of the previous 2 years.
