Carbon Brief explores how China has been driving the energy storage sector forwards and how it fits into the nation's wider energy transition.

During the 14th Five-Year Plan period, China's energy storage technology mix witnessed noticeable changes where pumped hydro storage accounted for less than 40% for the first time while ...

China is looking to almost double its so-called new energy storage capacity to 180 gigawatts (GW) by 2027, according to an industry plan ...

Recently, Risen Energy and Brazilian MTR Solar have inked a strategic cooperation agreement for a 1GWh energy storage system. Over the next two years, Risen will provide MTR with ...

The Energy Storage Industry White Paper 2025 reveals that global new energy storage installations reached 165.4 GW in 2024, with China contributing 43.7 GW of new capacity.

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery ...

The China Energy Storage Alliance is a non-profit industry association dedicated to promoting energy storage technology in China.

The project not only sets a new record for the installed capacity of grid-connected semi-solid-state lithium battery energy storage in China, but also marks a crucial step for China's semi ...
