The latest update to its Global Li-ion Battery and Battery Manufacturing Equipment data by Interact Analysis reveals energy storage (ESS) battery shipments are expected to drive global ...

By bridging the gap between academic research and real-world implementation, this review underscores the critical role of lithium-ion batteries in achieving decarbonization, integrating ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

InfoLink sees global energy-storage installation increase by 50% to 165 GWh and energy-storage cell shipments by 35% to 266 GWh in 2024.

In the second half of 2024, several large GWh orders were signed in the UK, Saudi Arabia and Australia. As a result, global energy storage battery shipments (ESS LIB) reached 369.8GWh, ...

J.P. Morgan's recent analysis shows that shipments of stationary energy storage batteries will rise by 50% in 2025 and 43% in 2026. This surge is causing the lithium supply to move ...

In the past five years, over 2 000 GWh of lithium-ion battery capacity has been added worldwide, powering 40 million electric vehicles and thousands of battery storage projects.

In 2024, global Li-ion battery shipments reached an estimated 1,353 GWh. This is a year-on-year increase of 23% and 1.7 percentage points higher than the figure we presented in September 2024. ...
