Will East Timor transition its energy sector?

Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants. In 2021, it announced tendering for solar parks and a feasibility study for hydropower schemes.

Does East Timor have electricity?

Recovery was slow after East Timor gained formal independence in 2002. By 2015, just 60% of the population had access to electricity, according to the World Bank. Efforts to electrify the country have jumped since then, with 100% of residents having access to electricity since 2021, according to the International Renewable Energy Agency.

Why is East Timor struggling to overcome its dependence on diesel?

East Timor, a small country in Southeast Asia, is struggling to overcome its heavy dependence on diesel despite significant commitments to renewable energy. Although the government has promised to promote wind, solar, and hydropower, the transition remains slow.

Does East Timor need financing?

The share of renewable energy in the country's energy mix has only made slow progress in recent years, indicating that additional efforts are needed to meet the set goals. One of the main obstacles for East Timor remains financing.

The small Southeast Asian nation of East Timor is at an energy ...
