You can buy additional spare parts such as IPHS inverter, power module, battery module, backup box, and intelligent electric quantity collector to increase usage hours and/or other solutions.

Functions Fully integrated system with battery, PCS, and EMS Advanced liquid ...

Our inverters are essential components of solar energy systems, converting the direct current (DC) generated by solar panels into alternating current (AC) for home use.

The Integrated Cabinet-215KWh is a complete commercial energy storage solution with 215kWh capacity and 100kW inverter power. Designed for business and industrial applications requiring ...

A commercial energy storage system works by storing excess energy generated by the solar panels during the day in a battery storage system. This stored energy can then be used during times when ...

It adopts an integrated liquid-cooling system, with a high-efficiency inverter compressor and intelligent speed regulation of the fan.

This fully integrated 100kW/215kWh system combines high-density battery storage with intelligent power management in a single, factory-assembled unit - delivering unmatched performance and reliability ...
