What is the Solar System Family Portrait?

The Solar System Family Portrait is an image of many of the Solar System 's planets and moons acquired by MESSENGER during November 2010 from approximately the orbit of Mercury. The mosaic is intended to be complementary to the Voyager 1 ' s Family Portrait acquired from the outer edge of the Solar System on February 14, 1990.

What is Voyager's 'Solar System Family Portrait'?

In the briefing, mission representatives reveal Voyager's "Solar System Family Portrait," a mosaic comprising images of six of the solar system's eight planets, taken by Voyager 1 on Feb. 14, 1990, when the spacecraft was beyond the orbit of Neptune--about 3.7 billion miles (6 billion kilometers) from the sun.

Did Voyager 1 take a 'portrait' of the Solar System?

These six narrow-angle color images were made from the first ever 'portrait' of the solar system taken by Voyager 1, which was more than 4 billion miles from Earth and about 32 degrees above the ecliptic. The spacecraft acquired a total of 60 frames for a mosaic of the solar system which shows six of the planets.
