Knowing this, it's possible through some tries of loading and unloading the chunks with the Wind Mills to get a constant high EU output using chunk loaders. It is advised to dismantle a wind mill with a ...

This channel is ALL about bringing you consistent Minecraft content that is short, precise, and to the point!

The wind strength is determined by the height, weather and random chance. Wind strength rises with height, the wind strength below a height of 64 is insufficient for the Kinetic Wind Generator function.

Directional Wind Turbines are the first actually good generator because they last for 30 days instead of 20. The Spice production requirement is quite easily met by anybody who plays ...

The wind generator provides a consistent amount of energy depending on how high it is placed in the world. The generator cannot be blocked by solid blocks above it, but transparent blocks ...

I liked the biofuel generators, the mekanism crusher per leaf yield is really high and if you use mekanism pipes to move stuff where it needs to go it's really easy to backlog a ton of energy middleish game, ...

The turbine blades have no collision box so Wind Generators can be placed adjacently but the blades will appear to be passing through each other. Wind Generators can be placed with a gap of 3 blocks ...

This content is only available with Mekanism: Generators installed. A Wind ...
