Best in class cost leadership driven by value engineering and world class supply chain efficiency.

CHINT residential solar solution helps you to embrace a sustainable, cost effective energy life. Our solar systems are designed to power your entire home effeciently, making it a smart investment for long ...

CHINT Residential Solar Power Solution utilizes idle rooftops and open spaces to create distributed PV systems, offering reliable, high-efficiency energy generation that can be used for self-sufficiency or ...

The 1MW PV grid-tied system consists of two 500kW inverters which output 270V three-phase AC, then by boosting the voltage of which to 10kV or 35kV to feed to the grid.

Through our technologies and expertise, we are making deeper integration of solar power into various scenarios. The best way to boost economic benefits out of limited land availability.

CHINT New Energy"s Midden Groningen 103MW photovoltaic power station in the Netherlands has successfully connected to the grid.The project installed approximately 315,000 CHINT-developed ...

In the regions where wind power generation and small-sized hydraulic power generation are available, combined power generation system can be set up, e.g. wind power generation and solar power ...

Solar system has many different regions, and does not consume any fuel or have any moving parts. The malfunction rate is low; the maintenance and servicing is easy and simple; it does not require any ...
