But here's the shocker: these massive projects are quietly reshaping how we keep lights on, factories humming, and Netflix binges uninterrupted. This article isn't just for engineers in hard ...

The US Energy Information Administration expects 18.2 GW of utility-scale battery storage resources to come online this year, or 29% of anticipated capacity additions, second only to solar ...

Markets such as the Southwest Power Pool (SPP) saw renewed activity, with three projects coming online in Oklahoma--the first in the region in three years. Florida and Georgia saw ...

Quidnet Energy, ENBW, and Peak Energy have energy storage projects in the works in the U.S. and Europe. A Texas startup has completed a key test for its long-duration geomechanical ...

US utilities are poised for a massive energy storage expansion, with over 18.5 GW planned. Learn about state targets, innovative technologies, and the future of grid modernization.

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

The US state of Massachusetts has selected four battery projects totaling 1.3 GW under its first major procurement round to meet a statutory target of 5 GW of energy storage by 2030.

In Q2 2025, a record 5.6 gigawatts (GW) of new capacity came online, according to the latest US Energy Storage Monitor report from the American Clean Power Association (ACP) and ...
