Gambian utility Nawec is seeking proposals for a 50 MW PV plant planned to be deployed in Soma, south of the Gambia River. The project is part of a broader solar project that will eventually include ...

Enter the Banjul Power Plant Energy Storage initiative--a game-changer for Gambia's energy resilience. This project isn't just about storing electrons; it's about safeguarding hospitals, schools, and ...

The MEGATRON 1MW Battery Energy Storage System (AC Coupled) is an essential component and a critical supporting technology for smart grid and renewable energy (wind and solar).

The project's development objective is to support the government of The Gambia (GoTG) in piloting the implementation of a sustainable solar and battery energy storage system (BESS) ...

In The Gambia, under the Gambia Electricity Restoration and Modernization project (GERMP), investments have been anchored on multi-year least-cost power development plans.

Gambia's Ministry of Petroleum and Energy (MoPE) and state-owned utility Nawec have jointly launched a tender for the construction of a 50MW Solar Storage System in Soma, south of the ...

The Gambia benefits from around 3,000 hours of annual sunshine, translating to a minimum daily solar production capacity of 4 kWh per m². In terms of wind power, the country enjoys ...

The emphasis on clean, affordable energy comes at a critical time for The Gambia, where growing demand for electricity is outpacing current supply infrastructure.
