-----

The German market for solar-powered water pump inverters is witnessing steady growth, driven by strong environmental policies and a focus on sustainable agriculture.

Designing efficient products delivers more water, improves reliability and lowers the total cost of the system. LORENTZ systems will run cooler, need less PV modules and pump water when others will ...

It converts the DC power generated by solar panels into AC power that can be used to drive the water pump, providing an efficient and sustainable solution for water pumping needs.

Choosing the optimal DC solar water pump system is paramount to ensuring efficient and reliable water delivery. It requires a careful assessment of your water needs, the characteristics of your water ...

The AMA Permanent Magnet Solar Pump consists of a PM-S solar pump inverter and a brushless permanent magnet pump. The AMA PM-S solar pump inverter uses the patented dynamic VI ...

LORENTZ helical rotor (progressive cavity) pumps are designed to operate in challenging environments with no maintenance resulting in reliable performance and reduced operating costs. Our super ...

Compared to diesel generator pumps, our solar pump inverter are environmentally friendly, with a long lifetime and low maintenance costs. It is independent from the grid and produces no pollution or ...

INVT GD100-PV solar pump inverter is specially designed for photovoltaic (PV) water pump systems. It is suitable for agricultural irrigation, water supply in mountainous areas, desert control, and other ...
