Ending a long-term solar agreement requires a clear understanding of your options. This guide explains your rights and potential ways to resolve your contract.

Hanergy Holding Group Ltd. is a multinational clean energy company as well as the world's leading thin-film solar power company, committed to changing the world by clean power. Established in 1994, the ...

When solar projects reach the end of their expected performance period, there are several management options. They include extending the performance period through reuse, refurbishment, or repowering ...

Decommissioning refers to removal of equipment and restoration of the site. Unlike some other forms of development, a decommissioned solar project site can be repurposed for other uses, such as ...

When you create a plan for solar panel decommissioning, you must identify what will happen to the decommissioned solar panels, inverters, racking system, and other components.

A solar contractor recently shared: "We helped a client score 30% higher compensation simply by rescheduling removal from June to July 1st." Now that's smart timing!

Many banks, credit unions and online lenders offer these to fund solar panels and installation, with amounts typically from \$1,000 to \$100,000, and annual percentage rates ranging from 6% to 36%.

What a solar contract is, key terms and core elements to know, how to evaluate your contract, and the importance of understanding your agreement.
