To be known as the Hantile, the new product encapsulates a thin, light and flexible copper indium gallium (di)selenide (CIGS) thin-film solar chip into float glass that maximises the conversion rate ...

With efficiency of greater than 15%, the panel exceeds silicon performance with low temperature coefficient. In addition, the panel is designed with low system cost in mind.

Unlike conventional panels, Hanergy's thin-film technology demands special handling. Their lightweight design (up to 30% lighter than silicon panels) allows unique mounting solutions but requires specific ...

Hanergy, a multinational clean energy generation company began almost 25 years ago and grew to be the World's largest thin film solar (CIGS) technology company with installed capacity over 6GW ...

These unique qualities make it adaptable to a wide range of applications, including Building Integrated Photovoltaics (BIPV), residential power, agricultural applications, automobile power, electronics, ...

Thin-film solar technology enables cutting-edge features such as flexibility, light weight, superior low light performance, and diversified color and shapes.

Incorporated in California as Hanergy Thin Film Power America Inc. and doing business as Hanergy America Solar Solutions, our team has been active in the U.S. market since 2010 and is comprised of ...

The panels are the highest efficiency, flexible, thin-film product on the market today, with >17% cell efficiency. The FLEX Series module bonds to surfaces with a simple peel-and-stick adhesive.
