In May 2024, our partner Solenergi FUSen mounted the biggest Over Easy Solar installation so far - a 248.4 kWp solar installation on the rooftop of the Norwegian National Football ...

Imagine a world where clean energy is stored efficiently, transported effortlessly, and scaled for cities or remote sites alike. That's the promise of the Oslo Energy Storage Container House --a ...

The national football stadium of Norway, the Ullevaal in Oslo, has incorporated 1,242 vertical bifacial solar panels on its roof, becoming the largest installation for energy production of this ...

Take the Vulcan Project in Oslo West--this hybrid system combines solar thermal storage with phase-change materials, providing 150MW of baseload power during Norway's darkest months.

Oslo's photovoltaic energy storage approach isn't just a Band-Aid solution - it's redefining how we conceptualize urban power networks. The modular design allows gradual implementation, avoiding ...

As the photovoltaic (PV) industry continues to evolve, advancements in Oslo energy storage power station installation have become critical to optimizing the utilization of renewable energy ...

In a significant step towards sustainability, Ullevaal Stadion located in Oslo, has embraced solar energy. The iconic venue, home to the national football team and the Norwegian Cup Final, recently installed ...

We want to be a driving force to ensure more climate friendly solutions for Norwegian sports facilities. The energy storage system at Bislett stadium enables us to utilize the solar production better, and ...
