What is a Horizon Power Standard?

(Informative) Horizon Power has endeavoured to provide standards of the highest quality and would appreciate notification of errors or queries. Each Standard makes use of its own comment sheet which is maintained throughout the life of the standard, which lists all comments made by stakeholders regarding the standard.

What if Horizon Power remote monitoring equipment is out-of-scope?

Configuration of the Horizon Power supplied remote monitoring equipment is out-of-scope. The SPS shall monitor and transmit to the Remote Monitoring and Communication System the data specified in the Horizon Power document Appendix C - Data Point Requirements for Technical Specifications.

What is a stand-alone power system (SPS)?

Created through Ampcontrol and Horizon Power's joint venture entity, Boundary Power, each Stand-alone Power System (SPS) has been manufactured to provide off-grid, utility-grade, reliable supply to isolated consumption sources.

What environmental conditions should a Horizon Power Equipment be suitable for?

Conditions to consider include solar radiation, pollution (salt bearing and industrial), humidity and wind velocities. The equipment shall be suitable for continuous operation under the relevant environmental conditions stated in HPC-9EJ-01-0001-2013 Horizon Power Environmental Conditions for the duration of its design life.

Horizon Power Systems has worked exclusively with Capstone Green Energy Corp. to provide microturbine-powered onsite power generation in prime, backup, and combined heat and ...

The funding will support Horizon's ReGen program and enable it to deliver 13 standalone power systems (SPS) in remote communities and undertake the planning and early-stage ...

We're installing 50 Standalone Power Systems (SPS), customised to meet the needs of our end-of-grid customers. These SPS will operate independently from the main electricity network and provide ...

Horizon Power's development and installation of standalone power systems, or SPS, are an innovative solution to supplying clean and reliable power to remote ...

Horizon Power has been trialling the use of standalone power systems, consisting of solar power, battery

storage and back up power supplies, as an alternative to maintaining costly network ...

Horizon Power wants five standalone renewable-first generators to supply power to remote towns in the north of Western Australia, and has explicitly ruled out fossil fuel-only options.

Created through Ampcontrol and Horizon Power's joint venture entity, Boundary Power, each Stand-alone Power System (SPS) has been manufactured to provide off-grid, utility-grade, reliable supply to ...

This Technical Specification (Specification) covers Horizon Power's technical requirements for a stand-alone power system known as a Standalone Power System (SPS).
