Although the country maintains a clear lead, its grip is weakening due to the rise of new players and sharp price drops. The year 2024 marked a turning point for the industry.

With solar panel prices tumbling, project developers will need to be vigilant about quality. Comprehensive product testing could be a vital safeguard as PV manufacturers ...

During the first three quarters of 2025, the photovoltaic industry has reached a new balance among the leading manufacturers. Although Chinese companies continue to dominate, ...

Solar panel and inverter manufacturers ranking: Bloomberg (BNEF) Tier 1, production capacity, bankability and annual shipments reports

The rankings assess not only market performance and financial metrics, but also innovation capability, social responsibility, and sustainable development, reflecting the industry's ...

A total of 18 Chinese companies were selected in the top 20 list, with a total output of more than 440GW in 2023, gradually taking over the global PV module market with their unique ...

To mitigate solar panel degradation, choose high-quality panels with low annual degradation rates and robust performance warranties that guarantee a certain efficiency level over time

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...
