In a perfect world, the average roof in the U.S. can generate ...

You use many to indicate that you are talking about a large number of people or things. I don't think many people would argue with that. Not many films are made in Finland. Do you keep many books ...

One kilowatt-hour equals 1,000 watts used for one hour. For example, a 400-watt solar panel produces 400 watts of power in an hour under perfect sunlight. If it gets 5 hours of full sun, it ...

Over one peak sun hour, that's 0.4 kilowatt-hours (kWh) of energy. At this point it would also be beneficial to revisit the difference between a kilowatt, and a kilowatt-hour. In short, Kilowatts ...

In summary, the number of kilowatt-hours a solar panel can produce depends on several internal and external factors, with power generation varying greatly throughout the day and year.

The meaning of MANY is consisting of or amounting to a large but indefinite number. How to use many in a sentence.

A single solar panel can typically produce 1.5 to 2.4 kWh daily depending on conditions. Over a month, that equates to roughly 45-72 kWh per panel in optimal conditions.

We use many to refer to a large number of something countable. We most commonly use it in questions and in negative sentences: ...
