Many, as a general term, refers to a large number, quantity, or amount. It indicates a plural or multiple existence of something, suggesting that there is a significant or considerable quantity of that ...

China's 2022 deployment of 1.2 million 5G base stations, primarily using LFP battery systems, demonstrates this technological alignment. Grid instability in emerging markets forces operators to ...

The transition towards renewable energy sources and the increasing number of telecommunication towers globally are key factors propelling the demand for lithium batteries in this sector.

You use many to indicate that you are talking about a large number of people or things. I don't think many people would argue with that. Not many films are made in Finland. Do you keep many books ...

Lithium ion telecommunication batteries typically use lithium iron phosphate (LiFePO₄) battery cells, with 15 or 16 battery cells connected in series to form a battery pack.

We use many to refer to a large number of something countable. We most commonly use it in questions and in negative sentences: ...

The phrase "communication batteries" is often applied broadly, sometimes including handheld radios, emergency devices, or general-purpose backup batteries. In practice, when ...

Many definition: Amounting to or consisting of a large indefinite number.
