How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$51,860 in May 2024. Employment of solar photovoltaic installers is projected to grow 42 percent from 2024 to 2034, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

How do I become a solar photovoltaic installer?

There are multiple paths to becoming a solar photovoltaic (PV) installer, or PV installer. These workers typically need a high school diploma, but some take courses at a technical school or community college; they also receive on-the-job training lasting up to 1 year. Some PV installers learn to install panels as part of an apprenticeship.

What does a solar photovoltaic installer do?

Solar photovoltaic installers usually work as part of a team. Solar photovoltaic (PV) installers, also known as PV installers, assemble, set up, and maintain rooftop or other systems that convert sunlight into energy. At the jobsite, PV installers verify the measurements and design of the structure on which the PV system is being set up.

Are solar photovoltaic installers safe?

Solar photovoltaic installers risk falls from ladders and roofs, shocks from electricity, and burns from hot equipment and materials while installing and maintaining PV systems. To reduce the risk of injury, PV installers must wear safety equipment, such as harnesses, gloves, and hard hats.

Salaries for entry-level roles in a solar bracket facility typically range from \$30,000 to \$40,000 annually, depending on the geographical location and specific company practices.
