How does the OECD determine the price of lithium?

The OECD provides a comprehensive framework for determining the price of lithium. Here are the main factors that affect lithium price: Market Conditions and Demand: The surge in demand from electric vehicles, portable electronic devices, and energy storage options significantly influences lithium demand.

Why is lithium so expensive?

Quality and Grade of Lithium: Battery grade (higher purity) commands premium prices over industrial grades. Production Costs: The costs to extract and process lithium from brine or mineral sources play a critical role in its market price. These costs are influenced by technological efficiency, energy prices, and regulations.

Why are Lithium prices plunging?

*Updated every hourly. Click here to learn why lithium prices are plunging and what to expect. Lithium prices surged today as Chinese authorities canceled 27 mining permits in the key Jiangxi hub, exacerbating supply tightness from the ongoing suspension at CATL's Jianxiawo mine.

Why did Lithium prices surge today?

Lithium prices surged today as Chinese authorities canceled 27 mining permits in the key Jiangxi hub, exacerbating supply tightness from the ongoing suspension at CATL's Jianxiawo mine. Bullish sentiment was further fueled by aggressive pre-holiday restocking and manufacturers rushing to front-run upcoming export rebate cuts.
