**NOTE:** This procedure describes how to position and interconnect several battery cabinets. If your system only has one battery cabinet, you only need to follow step 2 and step 3.

The option provides functional access to the equipment circuit breaker via a handle located on the exterior of a cabinet door that is physically connected to the circuit breaker in the cabinet's interior.

This manual contains information on Atlantic Battery Systems battery cabinets. The information in this manual is intended for Qualified Installers, Equipment Engineers, and Field Support Personnel.

This addendum includes additional information for the installation of the TP120 lithium battery cabinets to the Keor MOD UPS. It is mandatory to contact the Legrand Technical Support Service for the ...

One of the most common mistakes is to parallel all the batteries together and then connect one side of the parallel battery bank to the electrical installation.

It connects the battery strings in parallel to extend the backup time of the UPS. The factory-provided communication cable has an RJ-45 terminal on each end for communicating with the battery cabinets.

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector.

Connect the battery cable accessory to one end of the battery port on the rear panel of the UPS and connect the other end to any battery port on the rear panel of the EBC.
