In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

The incident exposed a chilling reality: Chinese-made solar inverters, critical components in renewable energy systems, contain hidden cellular technology that allows remote ...

One such incident occurred in November, when solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity...

In 2023, 78% of all inverters installed in Europe came from Chinese vendors, with the overwhelming majority being made by Huawei and SunGrow, according to DNV, a risk consultancy. ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

The world's largest supplier of inverters is Huawei, the Chinese tech giant that was barred from US telecoms networks on national security grounds in 2019 during President Trump's first term.
