Guided by our National Electricity Plan and bold climate pledges, we aim to achieve 500 GW of renewable energy capacity by 2030--a goal that reflects our resolve to lead globally in clean energy. ...

India Energy Storage Alliance (IESA) is a leading industry alliance focused on the development of advanced energy storage, green hydrogen, and e-mobility techno

Electric utility and generation company Tata Power has received regulatory approval to deploy a centrally controlled battery storage system in Mumbai, India.

Tata Power has secured approval from the Maharashtra Electricity Regulatory Commission (MERC) to install a 100 MW battery energy storage system (BESS) in Mumbai over the next two years. This ...

It will protect essential services including the Mumbai Metro, hospitals, airports, and data centers from large-scale blackouts. The system is also designed to optimize reactive power ...

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by ...

The AES-Mitsubishi Rohini - Battery Energy Storage System is a 10,000kW lithium-ion battery energy storage project located in Rohini, NCT, India. The rated storage capacity of the project is 10,000kWh.

As renewable energy adoption accelerates, BESS plays a pivotal role in enabling a smoother transition. Compared to conventional alternatives, BESS offers a more cost-effective, faster-to-deploy solution ...
