CSA Group will evaluate or test your projects including cells, packs, appliances and tools, e-mobility devices, and energy storage systems at our state-of-the-art laboratories. We can also conduct an ...

Testing and certification services for battery or energy storage systems used in electric vehicles, energy storage and distribution systems, and other large format applications. Our services are designed to ...

From lithium-ion to lead-acid, industrial battery compliance is critical. Learn the differences between IEC 62619 and UL 1973, testing protocols, safety measures, and how standards ...

Our test solutions are designed to test battery cells, modules, packs and battery management systems for e-mobility, mobile, industrial, and stationary use.

Using high-precision measurement technology and powerful climate, shock, and vibration systems, we test your battery under realistic and extreme conditions. Whether thermal shock, IP or ...

For stationary lithium-ion batteries, T&#220;V S&#220;D tests your products according to IEC 62619. This standard addresses safety testing at cell level. It includes tests for short circuits, overcharging, thermal abuse, ...

Overview of lithium-ion battery storage performance tests, including objectives, steps, and standards for normal temperature storage, high heat, and shell stress.

Understanding how to test a lithium ion energy storage system is part of our commitment to quality and safety, ensuring every installation performs efficiently and safely over its lifetime.
