We believe Mexico will be key to the future of the development of lithium batteries as home to the world's largest single lithium field - "La Ventana" in Sonora.

The White Paper on Energy Storage in Latin America and the Caribbean, published by the Latin American Energy Organization (OLADE), highlights Mexico's introduction of a ...

Mexico's new regulation mandating battery systems for solar and wind projects positions it as a model for energy storage integration in Latin America, according to a new report.

Summary: Mexico's renewable energy boom is driving demand for lithium battery storage systems. This article explores how lithium-ion technology is transforming industries like solar power integration, ...

With its proximity to the U.S. market, skilled workforce, and competitive operational costs, this Mexican city is attracting global players. But what makes it stand out for lithium battery pack production? Let's ...

This report discusses the growing role of variable generation from wind and solar, the need for improved grid flexibility, and how battery storage can provide flexibility to facilitate higher penetrations of ...

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid stability, private investment, and the future of energy ...

In response to more frequent blackouts, Mexico recently developed hybrid plants that have both a solar power generating capacity and battery storage capabilities.
